Jurisdiction, money and delivery

Who has the authority to act on this problem, where does the money come from, and where does delivery break down?

Today

By the end of today, you will have

Mapped the jurisdiction, funding route and delivery chain for your case, and run a PESTLE check on your issue tree.

- Locate your subject in the Seventh Schedule, and in the Eleventh or Twelfth Schedule where relevant.
- Trace how the activity is funded: scheme, budget head and cost sharing.
- Map the delivery chain from policy-maker to citizen and mark the likely break point.
- Use PESTLE to check your issue tree for missing factors.

Competencies: D1 · D2 · D3 · D5

Session plan

10 min	**Opening problem**
25 min	**Concept: three kinds of power**
20 min	**Demonstration: Madhyapur chain**
30 min	**Activity: follow the money**
25 min	**Own case: chain and funding**
10 min	**Debrief and exit task**

Opening problem

- **Your recommendation is excellent. The office you addressed it to has no power to carry it out. What went wrong?**

Name one public problem where authority is split between the Union, a state and a local body.

Three different kinds of power

1

Legislative authority

Who can make law on the subject? The Union, State and Concurrent Lists of the Seventh Schedule decide.

2

Administrative control

Who runs the service day to day? Often a state department, a district office or a local body.

3

Money

Who pays, and on what conditions? Schemes, grants and own revenues carry rules that shape what is possible.

These often sit with different bodies. A recommendation must be addressed to the one that can actually act.

Where some public subjects sit

Subject	Where it sits	What it means for a recommendation
Public health and sanitation	State List, entry 6	States legislate; Union influence comes through schemes and funding
Local government	State List, entry 5	States define what municipalities and panchayats may do
Education	Concurrent List, entry 25	Union and states both legislate; national missions sit beside state systems
Solid waste management	Twelfth Schedule, item 6 (74th Amendment)	A function states may devolve to municipalities
Rural employment guarantee	Union law (2005), delivered by states and panchayats	The Union sets entitlements; states and panchayats implement

Check the entry for your own subject in the Constitution itself before you cite it.

Where the money comes from

1

Central sector schemes

Funded and run by the Union through its own agencies.

2

Centrally sponsored schemes

Designed by the Union, implemented by states, funded jointly under a sharing pattern set in the scheme guidelines.

3

State and local funds

State budgets, Finance Commission transfers to states and local bodies, and local revenue such as property tax and user charges.

Find the budget line that would pay for your recommendation. PRS Legislative Research and Open Budgets India publish readable analyses.

The Madhyapur delivery chain

Intent is clear at the top. It weakens where supervision meets the crews: ward staff cannot make crews do what the contract does not reward.

A thinker for your case

Lant Pritchett and Devesh Kapur

"Is India a Flailing State?" (2009); "Why Does the Indian State Both Fail and Succeed?" (2020)

Pritchett described a state whose capable head is not reliably connected to its limbs. Kapur showed that the Indian state can manage some complex tasks at enormous scale while performing poorly on core everyday public goods.

The question it puts to your case

At which link in the delivery chain does intent at the top stop becoming action on the ground?

Answer it in one sentence in your workbook today.

PESTLE as a completeness check, not an essay

Factor	Question for the issue tree	Madhyapur
Political	Is there a branch for electoral or council pressures?	Councillors resist penalties before ward elections
Economic	Are costs and incentives covered?	The contract pays by weight; no user charge (illustrative)
Social	Are norms and the division of labour covered?	Waste work is stigmatised; household sorting falls mostly on women
Technological	Are vehicles, facilities and data covered?	Single-compartment vehicles; no ward data system
Legal	Are rules, by-laws and contracts covered?	The 2016 rules, city by-laws, the collection contract
Environmental	Are environmental effects covered?	A landfill near capacity; risks of burning and leachate

Add a branch only if the factor would change the analysis. Otherwise leave it out.

Activity: Follow the money

Trace how a public service is authorised, funded and delivered, from the Constitution to the citizen.

Scenario

Each pod takes one common case: wage payments under the rural employment guarantee; school meals (PM POSHAN); staffing at primary health centres; or a city bus service. Using the Constitution, scheme guidelines and a published budget analysis, find who legislates, who administers and who pays.

What to do

1. Find where the subject sits: a Union, State or Concurrent List entry, or a local government schedule.
2. Find the scheme or budget line that funds it, and the sharing pattern.
3. Map the delivery chain from ministry to citizen in five or six links.
4. Mark where delivery is most likely to break, and why.
5. Present in two minutes; another pod's evidence checker verifies one claim.

Time 30 minutes

Groups Pods of four, one case per pod

Output A delivery chain with jurisdiction, funding and a marked break point

Your case: Worksheet 3.1

Jurisdiction, funding and delivery chain

1. Find where your subject sits in the Constitution and record the entry.
2. Identify the scheme or budget head that funds the activity and the sharing pattern, with year and source.
3. Map the delivery chain from policy-maker to citizen.
4. Mark the link where delivery most likely breaks, and the evidence you would need.
5. Run the PESTLE check on your issue tree; add only factors that change the analysis.

Hand in

Worksheet 3.1 by the start of Day 7.

Quality check

The three powers are identified separately, with sources.

Tag every claim in your Analyst's Ledger: fact, inference, assumption or hypothesis.

What to take away

1. Legislative authority, administrative control and money often sit with different bodies.
2. Address your recommendation to the body that can act, and find the budget line that would pay for it.
3. Map the delivery chain: failures usually sit at a specific link.
4. PESTLE is a check for missing branches, not an essay.

Exit task Name the body that holds the power your recommendation will need most.

Before the next session

Independent work

Find the most recent budget figure for the scheme or head that funds your problem, with year and source, and note it for your evidence register (which opens on Day 10). Check whether a CAG report, standing committee report or social audit has examined the service. About 45 minutes.

Read

Pritchett, "Is India a Flailing State?" (2009), the opening sections.
